WORK EXPERIENCE

Hutchison Telecommunications Lanka (Pvt) Ltd   MAY 2024 - APRIL 2025
Projects & Solutions | IT & Core Network Department

Perform business analysis, quality assurance, database management, and project management by gathering and analyzing requirements for systems such as web application firewall setups, retail promotion programs, and sales analytics dashboards. Design solutions to enhance operational efficiency and streamline processes, including retail promotion programs, sales analytics dashboards, and reporting tools. Conduct user acceptance testing (UAT) to ensure applications meet functional and quality standards. Generate reports using back-end systems. Coordinate with vendors and internal teams to monitor project progress and effectively manage system implementations. Prepare Product Concept Analysis Reports (PCARs) to support product launches and updates at Hutch.

  Rahula National School (Godakawela)

PROJECTS

Hutchison Telecommunications Lanka (Pvt) Ltd | 2024
- Managed a project to implement a retail promotion program for a selected retail network, focusing on daily new subscriber acquisitions. Prepare essential project documents, including the project scope document, generate reports using backend systems (sql & Linux), test plan and maintain clear communication with the Hutch marketing team and vendors. Additionally, oversee the testing process with different version releases, ensuring quality through the development and execution of test case documentation.
- Managed a project to create a Sales Analytics Dashboard and Reporting Tool with features like user tracking, itinerary creation, and admin management. Improved skills in project management, business analysis, and quality assurance while working closely with the Hutch marketing team and vendors. Led multi-stage testing to ensure quality by creating and using clear test case documents.

HD & BSc (Hons) Software Engineering | Cardiff Metropolitan University (ICBT) | 2021 - 2024
Developed below projects under the degree program.
- Land Price Prediction Web Application using Machine learning (Python Flask, Springboot, React, MySQL)
- Lab Appointment System using REST Web Service (Java)
- Final Project in HD as a Group work | Web Application for a Food Scheduling & Ordering System (Healthy Life)
- Web & Windows Application for the Footwear Company (C#)
- Web Application for the City Hospital (PHP, HTML, CSS, JavaScript, SQL)
- Mobile Application for the cup cake Factory (Java)
- System for Digital Tech Mobile Shop using OOP Concepts (Java)
- Creation of database for Library System (SQL)
- System Analysis & Design for the Online Fitness Management System
- Program to Play Rock, Paper, Scissor game (C++)
